

## Summer school in Decarbonisation and Chemistry FGL 2026 - July 1–10, 2026

Dear Partner,

We would like to begin by wishing you a very happy and prosperous New Year. We hope 2026 will be filled with exciting projects and fruitful collaborations.

We are pleased to announce that **Fédération Gay Lussac** (a network of 20 French Schools of Chemistry, including ENSIC – Université de Lorraine) will be organizing the **Decarbonation and Chemistry Summer School 2026 (July 1-10, 2026 in Mulhouse France)**, and we would be grateful for your support in sharing this opportunity with your students.

After a resounding success last summer with 15 brilliant international Master's and PhD students, the Gay-Lussac Federation - a powerful network of 20 top schools of chemistry and chemical engineering - is pleased to launch the second edition of its Summer School on Decarbonisation & Chemistry.

Why join?

Dive into a 10-day immersive experience (July 1–10, 2026) at ENSCMu in Mulhouse, France. Connect with innovation-minded experts, tackle real-world challenges, and shape the chemistry of tomorrow, for a sustainable, low-carbon future. Ready to make an impact? Don't miss your chance to be part of this transformative journey!

**Join us in Mulhouse for a unique experience at the forefront of tomorrow's chemistry!**

**Early birds before April 1<sup>st</sup>.** [Registration and information](#)

### **Scientific program**

Guided by distinguished academics and industry leaders, this programme will engage participants in addressing one of the defining challenges of our era: decarbonisation. A detailed schedule will be released in due course.

### **Visits and activities**

Participants will have the opportunity to visit our partner companies, gaining firsthand insight into cutting-edge industrial practices. In addition, a varied programme of cultural excursions and social events will be organised to enrich the overall experience.
